

# 2019 Auxin Specific Applicator Training

## Requirements summary for use of approved dicamba and 2,4-D herbicides

*Scott Nolte & Gaylon Morgan, Texas A&M AgriLife Extension, College Station, TX*  
*Peter Dotray, Texas A&M AgriLife Extension, Lubbock, TX*

---

The revised dicamba labels (Engenia, Fexapan, and Xtendimax) state that only certified applicators may apply these herbicides. These dicamba products are Restricted Use Pesticides (RUP) in addition to being State Limited Use (SLU) and require Auxin Specific Applicator Training annually prior to use. In addition, TDA has added 2,4-D Choline formulations (Enlist Duo® and Enlist One™) for use on 2,4-D tolerant crops to be included in these mandatory Auxin trainings. These 2,4-D herbicides are SLU pesticides, and they can be sold to and used only by certified applicators or those working under the supervision of a certified applicator. Annual training is also required prior to their use.

This handout contains resources for product, EPA and TDA websites, along with a summary of the application requirements for use of these products. This is not a substitution for completing the certified applicator training or the 2019 Auxin Specific Applicator training. Always read and follow the pesticide label.

## Application Requirement Summary for approved dicamba and 2,4-D herbicides

	Dicamba <sup>1</sup>	Enlist <sup>2</sup>
<b>Training</b>	Complete annual auxin-specific training	
<b>Use Approved Formulations ONLY</b>		
<b>Nozzle</b>	Go to herbicide website <sup>1</sup> or label <sup>2</sup> for list of approved nozzles and pressures	
<b>Wind Speed</b>	3 to 10 mph	
<b>Tank Mixtures/ Additives</b>	Go to herbicide website for updated list	
	NO ammonium salts or acidifying water conditioners (AMS or UAN)	No restrictions for using AMS
<b>Ground Speed</b>	< 15 mph	< 15 mph recommended
<b>Boom Height</b>	< 24 inches to spray target	Consult nozzle manufacturer < 24 inches recommended
<b>Application Volume</b>	15 GPA minimum	10-15 GPA minimum
<b>Sensitive<sup>1</sup> / Susceptible<sup>2</sup> Crops and Residential Areas</b>	<b>DO NOT</b> spray if wind is blowing toward neighboring sensitive <sup>1</sup> /susceptible <sup>2</sup> crops or residential areas <sup>1</sup>	
	Includes non-dicamba tolerant soybeans	Includes non-enlist cotton
<b>Sensitive Areas</b>	110' downwind buffer to non-residential, uncultivated areas or bodies of water. 57' omni-directional buffer in <b>EPA endangered species counties</b> .	30' downwind buffer to wooded areas, pasture, lawns, roadside ditch
<b>Timing (whichever comes first)</b>	Soybeans: Up to 45 DAP or beginning bloom Cotton: Up to 60 DAP or mid-bloom	Cotton: up to mid-bloom
<b>Weed Height</b>	4 inches or less for best performance	4-6 inches
<b>Sprayer Cleanout</b>	Triple rinse – use detergent based cleaner before & after application	
<b>Temperature Inversions</b>	<b>DO NOT</b> apply during a field level temperature inversion	
<b>Daytime Applications</b>	Only apply one hour after sunrise until two hours before sunset	<b>DO NOT</b> apply during a field level temp. inversion
<b>Rainfall</b>	DO NOT apply w/in 24 hrs of expected rainfall – runoff potential	Don't allow runoff
<b>Record Keeping</b>	Follow federal label requirements: application parameters, tank cleanout, planting date, and buffer zone determination. Create within 72 hrs.	Follow TX Dept of Ag Requirements
<b>No Aerial Applications</b>		
<sup>1</sup> Note is specific to dicamba products only		
<sup>2</sup> Note is specific to 2,4-D products only		

### ALWAYS READ AND FOLLOW LABELING FOR PRODUCT BEING APPLIED
